

# GRACE Science Data System Monthly Report

## February 2015

Prepared by:  
Frank Flechtner      GFZ      flechtne@gfz-potsdam.de

Contributions by:  
Srinivas Bettadpur      UTCSR      srinivas@csr.utexas.edu  
Mike Watkins      JPL      michael.m.watkins@jpl.nasa.gov  
Gerhard Kruizinga      JPL      gerhard.kruizinga@jpl.nasa.gov

Approved by:  
Byron Tapley      UTCSR      tapley@csr.utexas.edu

### Highlights:

- A 2-days orbit repeat cycle caused problems to calculate nominal Level-2 products for February 2015. This problem has and will also affect the January and March 2015 solutions. The SDS has worked on solution stabilization strategies resulting in the products as described in the following.
- CSR has generated and delivered following RL05 Level-2 products for February 2015 (Please refer to the corresponding notes on the CSR website and to the CSR L2 Release Notes):
  - A standard 60x60 solution where more aggressive than normal post-processing may be required.
  - Additionally, a deviant 60x30 product for experimental use is provided too.
  - No 96x96 solution will be generated and delivered.
- GFZ has generated and delivered following RL05a Level-2 products for February 2015 (see also GFZ L2 Release Notes):
  - A regularized 90x90 solution where more aggressive than normal post-processing may be required.
  - Additionally, a deviant 90x30 product for experimental use is provided too.
- JPL has generated and delivered following RL05.1 Level-2 products for February 2015 (see also JPL L2 Release Notes):
  - A standard 60x60 solution where more aggressive than normal post-processing may be required.
- The next GRACE Science Team Meeting is scheduled for September 21-23, 2015 in Austin. Further information will follow on the GSTM website at CSR at <http://www.csr.utexas.edu/grace/GSTM/>.

### **Satellite Science Relevant Events:**

- Operations in Science Mode throughout the month except for the periods highlighted in the L1B Data Processing section below.
- The actual mission status can be monitored at [http://www.csr.utexas.edu/grace/operations/mission\\_status/](http://www.csr.utexas.edu/grace/operations/mission_status/).
- The GRACE-1 Brouwer mean orbital elements on February 28, 2015 00:00:00 are as follows:  
A [m] = 6772902.672  
E [-] = 0.000802  
I [°] = 88.993108
- The satellites separation was 267,4 km on February 27, 2015 with a rate of 0,07 km/d. The next orbit maneuver will be needed early June 2015.

### **Level-0 raw data dump reception statistics at DLR ground stations Weilheim and Neustrelitz:**

GRACE-A Housekeeping:	100.0 %	GRACE-B Housekeeping:	100.0 %
GRACE-A Science:	100.0 %	GRACE-B Science:	100.0 %

### **Level-1 Data Processing:**

- Level-1B Release 02 instrument data have been processed at JPL and archived at GFZ ISDC and JPL PO.DAAC. Please refer to the statistics below.
- RL02 Notes:
  - On 2015-02-07 GRACE-B battery experienced loss of a second battery cell. This caused the MWA to be turned off over short periods resulting in KBR1B data loss.
  - 2015-02-08: See note for 2015-02-07
  - On 2015-02-10 GRACE-B executed an orbit maintenance maneuver around 07:57 UTC. GRACE-B was in attitude mode from 04:40 to 09:15 UTC. The KBR1B data is missing or degraded during this time.
  - On 2015-02-23: GRACE-A GPS tracking data missing from blackjack telemetry from 13:41 to 14:15 UTC.
  - On 2015-02-28 GRACE-A KBR telemetry data are missing during IPU reboot from 06:54 to 07:10 UTC.
  - KBR statistics:
    - A) KBR1B product name

B) Total arc length with data (hours)

C) Number of observations used in residual calculation

D) KBR-GPS range residual RMS (cm)

E) minimum KBR-GPS range residual (cm)

F) maximum KBR-GPS range residual (cm)

G) number of continuous segments in the KBR product

	A	B	C	D	E	F	G

KBR1B_2015-02-28_X_02.dat	23.6	16987	0.91	-4.0	5.1	3	

Following JPL RL02 L1B products are publicly available (green). June and July 2002 and June 2003 (red) are not provided due to accelerometer problems. For several months a significant number of Level-1 data is not available (blue): January and June 2011 (accelerometer data), May and October 2012, March and August 2013 (accelerometer and K-Band data), January and February 2014 (K-Band data), July and December 2014, January 2015 (accelerometer and K-Band data). RL00 and RL01 production has stopped with December 2004 and April 2012, respectively. See also corresponding newsletters.

- The L1B Read software has been updated to accommodate 64-bit machines but the software will also work on 32 bit machines. Please change RELEASE\_2008-03-20 to RELEASE\_2010-03-31 available at <ftp://podaac.jpl.nasa.gov/allData/grace/sw/>.
- Level-1B Release 01 generation has stopped with 30 April 2012.
- L1B De-aliasing Products Status (for details see AOD1B Product Description Document):
  - Release 01: Generation has been stopped June 30, 2007.
  - Release 03: Generation has been stopped January 31, 2007.
  - Release 04: Generated until April 30, 2012 and extended to 1976-2000 (see newsletter for December 2008). Generation has been stopped April 30, 2012.
  - Release 05: Generated for 1 January 1979 till 19 April 2015. **The data for the period 25 June 2013 till 27 July 2014 have been reprocessed (see Newsletter August 2014) and substituted in the archives.** The reprocessed products can be recognized by a processing time stamp later than 26 August 2014 in the header. Further information is available at <http://www.gfz-potsdam.de/AOD1B>.
  - Following AOD1B products are publicly available (yellow: RL01, RL03 and RL04; green: RL01 and RL04, blue: RL04 only, 'x' RL05):

Additionally to the standard monthly solutions, GFZ also provides weekly RL05a solutions (aligned to GPS weeks) which contain spherical harmonic coefficients complete up to degree and order 30. Currently, available weekly solutions cover the time span from 2003/01/05 till 2013/07/28. The weekly Level-2 products (GSM + GAX files) can be downloaded at ISDC and PO.DAAC. When making your request at the ISDC retrieval pages, please choose “GFZ Potsdam weekly” as “Processing Facility” to obtain these products. At the PO.DAAC archive, they can be found in the directory “allData/grace/L2/GFZ/RL05\_WEEKLY”. Weekly products can be identified by the string “GW30” instead of “G---“ in the product name.

- **CSR RL05:** GSM solutions for maximum degree and order 60 (incl. calibrated errors GSM\*.txt) and 96 (except January and February 2015) along with the GAC and GAD background model files are available for the period April 2002 until February 2015. **Products for June 2013 till July 2014 have been reprocessed and replaced in the archives (see August 2014 Newsletter).** Further details are listed in the CSR L2 Release Notes. Ongoing updates on CSR RL05 are provided at <http://www.csr.utexas.edu/grace/RL05.html>.

- GFZ has stopped RL05 processing end of July 2013 (now substituted by RL05a). For further details see Newsletter October 2013.
- JPL has stopped RL05 processing end of June 2014 (now substituted by RL05.1). For further details see Newsletter August 2014.
- GFZ and CSR have stopped RL04 processing end of April 2012
- JPL has stopped RL04 processing end of January 2012
- GFZ has stopped RL03 processing (Feb 2003 until Jan 2007 available at the archives. For further details refer to the GFZ RL03 release notes for Level-2 products).
- CSR has stopped RL01 processing. (Apr. 2002 until Dec 2006 available at the archives. For further details refer to the CSR RL01 release notes for Level-2 products).
- JPL has stopped RL02 processing (January 2003 until November 2005 available at the archives. For further details refer to the JPL RL02 release notes for Level-2 products).
- TN05/TN07 containing C20 estimates derived from SLR and using GRACE RL04/RL05 standards is periodically updated.

#### Miscellaneous:

- The proceedings of the 2014 GRACE Science Team Meeting, which took place at GFZ in Potsdam between September 29 and October 1, are available at <http://www.gfz-potsdam.de/grace/gstm/gstm-2014>.
- Lecture material from the 2011 and 2014 summer schools of the DFG Special Priority Program "Mass transport and mass distribution in the system Earth" can be downloaded at [www.massentransporte.de](http://www.massentransporte.de). Before using, please read the agreements on the cover page.
- The following acknowledgement shall be added to any new GRACE related publication (paper, poster etc.): *Acknowledgement: We would like to thank the German Space Operations Center (GSOC) of the German Aerospace Center (DLR) for providing continuously and nearly 100% of the raw telemetry data of the twin GRACE satellites.*

- A list of GRACE related publications which can be sorted by author or date is available at <http://www.gfz-potsdam.de/en/research/organizational-units/departments-of-the-gfz/department-1/global-geomonitoring-and-gravity-field/topics/development-operation-and-analysis-of-gravity-field-satellite-missions/grace/grace-related-publications/>, alternatively the list can be accessed via <http://www.gfz-potsdam.de/en/grace> and one further click on 'GRACE related publications' in the left column. The current status is 1310 papers. This list may be still incomplete. If you are missing a publication please send an e-mail to Frank Flechtner (flechtne@gfz-potsdam.de).
- Science data users are encouraged to submit citations of their own and other works related with GRACE to the bibliography web page implemented at PO.DAAC: <http://podaac.jpl.nasa.gov/grace/bibliography.html>.
